PRECISE & EXCLUSIVE

WE CRAFT DOORS THAT SEAMLESSLY MERGE SOPHISTICATION AND TECHNOLOGY, CUSTOMISED TO SUIT YOUR DESIRES AND COMPLEMENT YOUR HOME.

WELCOME

Welcome to Precise collection, your premier destination for modern aluminium doors that blend cutting-edge design with exceptional durability. Our doors are crafted to meet the highest standards of quality and performance, ensuring that your home not only looks stunning but also stands the test of time. At Alidoor, we are passionate about innovation and excellence, providing you with doors that are as beautiful as they are functional. Discover the Alidoor difference and elevate your home's entrance with our sleek, contemporary designs.

CHOOSE YOUR DESIGN

Designing your perfect aluminium door with Alidoor is a straightforward and enjoyable process. We offer a variety of modern styles, finishes, and features to help you create a door that perfectly complements your home's aesthetic. Here's how you can customise your ideal door:

- 1. Explore Our Modern Styles:** Our collection features a range of contemporary designs, from minimalist chic to bold and striking. Each style is crafted to provide a sleek, modern look that enhances the overall appeal of your home.
 - 2. Select Your Finish:** Choose from our premium RAL painted finishes, including our unique coloured copper and bronze finish. These finishes are designed to withstand the harshest environments, ensuring long-lasting beauty and protection against the elements.
 - 3. Customise Your Hardware:** Enhance your door with our selection of high-quality hardware. From stylish handles to robust locks, our accessories are designed to add both functionality and aesthetic appeal to your door.
 - 4. Optimize Security:** Your safety is our priority. Select from our advanced security features, including multi-point locking systems and tamper-proof cylinders, to ensure your home is protected against intrusions.
 - 5. Visualise Your Design:** Use our online configurator to bring your design to life. Experiment with different styles, finishes, and hardware options in a virtual 3D environment to see how your door will look before making a final decision.
- At Alidoor, we believe that every home deserves an entrance that is both stylish and secure. Start designing your custom aluminium door today and experience the Alidoor difference.

ROBUST CONSTRUCTION

Aluminium is renowned for its strength and durability. It is lighter than steel yet incredibly strong. At Alldoor, we use **2mm thick aluminium** for both the outer and inner skins, making it an ideal material for secure door construction. Our doors are built to withstand force and resist tampering. Additionally, **all our glass is 44mm triple-glazed, tempered safety glass**, providing excellent noise reduction and security. With Alldoor, you can have peace of mind knowing your doors are a reliable defense against potential intruders.

10

Years
Guarantee

Our 49mm Alldoor features a high-density EPS fire-retardant core and a 145mm of Thermo-Sol along the lock edge, ensuring that locks and handles can be securely fitted. The 2mm aluminium skins provide maximum protection and durability. The 44mm triple-glazed, warm edge tempered safety glass units in our Alldoor ensure that your door is not only secure and safe but also thermally efficient. For enhanced security and durability, consider upgrading your Alldoor to a full core of Thermo-Sol material.

STANDARD FOAM CORE

ADVANCED LOCKING SYSTEMS

Security is only as strong as the weakest link, which is why we equip our doors with high-quality locking mechanisms. Our range includes multi-point locking systems, which secure the door at multiple points along the frame, and tamper-proof cylinders that offer enhanced protection against forced entry. These advanced locks ensure that your door remains securely fastened, providing an additional layer of security for your home.

WEATHER & CORROSION RESISTANCE

Our doors are not only secure but also built to last. Our two coat RAL epoxy paint, including our unique copper finish is designed to withstand harsh weather conditions and resist corrosion. This ensures that your door remains both beautiful and functional for years to come, with minimal maintenance required.

ALI SECURE ONE AUTO LOCK

The standard Ali Secure One Auto-Lock features 4 "auto-fire" independently operating 20mm security dead-bolts.

As each "auto-fire" dead-bolt strikes the roller enhanced security keep it automatically throws an engages into the keep to weatherproof the door.

This "auto-fire" function also removes the requirement of lifting the handle to operate the lock.

It then only requires the turning of the key or thumb-turn to securely lock the door.

The standard lock can be used as a lever/lever or fixed pad/lever handle, a finger pull escutcheon only or bar handles and plain escutcheon with the choice of Key/Key or Key/Thumb-turn cylinder.

The Heritage version provides the pull escutcheon or bar handle option with the key in the more traditional higher position and incorporates 3 "auto-fire" dead-bolts.

Secured by Design

All hardware within the Alidoor range is Secured By Design Accredited

Faceplate	20mm Radius End
Backset	45mm

*Please note: For doors with a lever handle on the outer side, the hooks will engage but the door will not automatically lock. To lock the door, you will need to use the key to manually do this.

- 1 Steel hook
- 2 High performance gearbox
- 3 Optional area for motor

Widest installation tolerances

With an optimised hook design, the autoLock AV4 has the widest installation tolerances, reducing the need to adjust the lock through the life of a door, saving time and money.

Lowest operating forces

With 40% lower operating forces than the market leading AV2.

Solid anti-push back hooks

The door locking system features two solid hooks which throw automatically when the door is closed, ensuring complete engagement of the hook and security against the lock being pushed back as proven by PAS24.*

TaFa – the innovative daytime latch

The innovative daytime latch allows you to open the door from the outside without the use of a key. Single hand actuation for flexible entry is useful when instant access is needed over a short period of time.

Central magnetic trigger

Located in the central position, the magnet activates the trigger once the door is fully closed which reduces the risk of damage to the door frame.

Heavy duty steel keeps

Heavy duty keeps manufactured using high grade steel, plated to comply with EN1670 Grade 5, very high corrosion resistance.

APECS AP Cylinder

The APECS AP is our BSI 3 Star Kitemark, Sold Secure Diamond Standard Euro Cylinder which offers maximum protection. It safeguards from all forced methods of attack ranging from snapping, drilling, plug-extraction, picking and bumping.

The APECS AP cylinder is specifically designed to protect from unauthorised access. The AP cylinder is engineered with a unique sacrificial point, which

when tampered with externally sets an interlocking cam mechanism into action, preventing any further damage to the internal parts of the cylinder, whilst still keeping the lock operable from the inside.

*Requires registration for guarantee activation

ALUMINIUM DOOR HANDLES AND PULL HANDLES

Our range of aluminium door handles and pull handles offers the perfect blend of style, durability, and functionality, catering to both residential and commercial needs. Crafted from high-quality aluminium, these handles provide a sleek, modern look while ensuring long-lasting performance.

FEATURES

1. Durability:

Our aluminium handles are corrosion-resistant, making them ideal for various environments, including coastal areas. They withstand daily wear and tear, ensuring they remain functional and attractive over time.

2. Design:

Available in various finishes such as brushed, polished, matte, and anodised, our handles complement any door style. From contemporary to classic designs, there is a handle to match every aesthetic.

3. Ergonomics:

Designed with user comfort in mind, our handles provide a comfortable grip and ease of use. The smooth edges and thoughtful shapes make them suitable for frequent use without causing discomfort.

4. Versatility:

Our handles come in different sizes and styles, including lever handles, pull handles, and bar handles. This variety ensures that you can find the perfect fit for interior doors, exterior doors, and even sliding doors.

Balmoral Lever/Standard Lever Handle.

Available in: White, Black, Bright Gold, Bright Chrome, Satin Chrome, 7016 Grey, Graphite & Stainless Steel.

Architectural Lever Handle.

Available in: Bright Chrome, Bright Gold, Bright Bronze & Graphite.

Rose Backed Stainless Steel Handle.

PRODUCT RANGE

1. Lever Handles:

Ideal for both internal and external doors, our lever handles offer a sleek look with practical functionality. Easy to install and use, they are perfect for modern homes and offices.

2. Pull Handles:

Our pull handles are designed for both residential and commercial applications. They are perfect for larger doors and entryways, providing a robust and stylish solution. Available in various lengths, they can be installed vertically or horizontally.

3. Bar Handles:

These handles provide a minimalist look, ideal for modern and industrial-themed spaces. They are perfect for sliding doors and large entryways, offering both aesthetic appeal and ease of use.

Customisation Options

We understand that every project is unique, which is why we offer customisation options. Choose from different finishes, sizes, and shapes to match your specific requirements. Our team is ready to assist in selecting the perfect handle to complement your aluminium doors.

Installation and Maintenance

Our handles are designed for easy installation, with all necessary hardware included. Maintenance is straightforward, requiring only occasional cleaning with a mild detergent to keep them looking their best.

GUNTHORPE 1

Conclusion

Enhance the look and functionality of your doors with our premium aluminium door handles and pull handles. With their superior durability, versatile designs, and customisable options, they are the perfect choice for any setting. Explore our collection to find the ideal handle for your next project.

ALIDOOR ADJUSTABLE HINGES

This is a Face Fix hinge for ease of installation. This hinge automatically sets the correct compression so no need for adjustment. The hinge allows adjustment to be made horizontally and vertically to $\pm 2.5\text{mm}$. Easily removable cover. A very Slimline heavy duty hinge.

Available in: White, Black, Anthracite Grey, Brown, Caramel, Champagne Gold, Chrome, Satin Chrome & Brushed Nickel.
